Contents Volume 135

1 Adaptive memory programming: A unified view of metaheuristics
É.D. Taillard, L.M. Gambardella, M. Gendreau and J.-Y. Potvin

17 A time-dependent multiple criteria single-machine scheduling problem
K. Klamroth and M.M. Wiecek

27 A self-adaptive projection and contraction algorithm for the traffic assignment problem with path-specific costs
A. Chen, H.K. Lo and H. Yang

42 Solving a bicriteria scheduling problem on unrelated parallel machines occurring in the glass bottle industry
V. T'kindt, J-C. Billaut and C. Proust

50 Towards "zero abandonments" in call center performance
J.C. Duder and M.B. Rosenwein

57 An integer programming approach to the time slot assignment problem in SS/TDMA systems with intersatellite links
T. Lee and S. Park

67 Error bounds for the approximative solution of restricted planar location problems
B. Käfer and S. Nickel

86 The noising methods: A generalization of some metaheuristics
I. Charon and O. Hudry

102 An empirical evaluation of environmental efficiencies and firm performance: Pollution prevention versus end-of-pipe practice
J. Sarkis and J.J. Cordeiro

114 Light traffic in a cellular system with mobile subscribers and its applications
G. Yamazaki and S. Toshimitsu

128 Optimal investment in setup reduction in manufacturing systems with WIP inventories
T.J. Nye, E.M. Jewkes and D.M. Dilts

142 Interactive fuzzy programming for two-level linear and linear fractional production and assignment problems: A case study
M. Sakawa, I. Nishizaki and Y. Uemura

158 Using fuzzy numbers in knapsack problems
F.-T. Lin and J.-S. Yao

177 Single machine batch scheduling with resource dependent setup and processing times
T.C.E. Cheng, A. Janiak and M.Y. Kovalyov

184 The maximum absolute deviation measure in location problems on networks
M. Cruz López-de-los-Mozos and J.A. Mesa

195 Hierarchical location–allocation models for congested systems
V. Marianov and D. Serra

209 A fuzzy logic-based decision model to satisfy goals for successful product/service introduction
M.F. Shipley, A. de Korvin and K. Omer
220 The problem of highly constrained tasks in group decision support systems
J. Rees and R. Barkhi
231 Editorial: Financial modelling and the theory of finance
O. Loistl and N. van der Wijst
233 A pricing model for secondary market yield based floating rate notes subject to default risk
M. Frühwirth
249 Dynamic value at risk under optimal and suboptimal portfolio policies
G. Fusai and E. Luciano
270 Xetra efficiency evaluation and NASDAQ modelling by KapSyn
O. Loistl, B. Schossmann and O. Vetter
296 Fuzziness in valuing financial instruments by certainty equivalents
M. Rosaria Simonelli
303 Application of the fuzzy–stochastic methodology to appraising the firm value as a European call option
Z. Zmeškal
311 Corporate valuation, capital structure and risk management: A stochastic DCF approach
C. Casey
326 Capital budgeting, investment project valuation and financing mix: Methodological proposals
D. Babusiaux and A. Pierru
338 Default probabilities in a corporate bank portfolio: A logistic model approach
S. Westgaard and N. van der Wijst
350 On estimating the common point of intersection of curves
S.P. Ladany and I. David
361 Rotation cycle schedulings for multi-item production systems
G.H. Chan and Y. Song
373 On the widget remanufacturing operation
G. Ferrer
394 A new dominance rule to minimize total weighted tardiness with unequal release dates
M. Selim Akturk and D. Ozdemir
413 Genetic clustering algorithms
Y.-C. Chiou and L.W. Lan
428 Petri net approach to disassembly process planning for products with complex AND/OR precedence relationships
K.E. Moore, A. Günör and S.M. Gupta
450 Reducing the bandwidth of a sparse matrix with tabu search
R. Martí, M. Laguna, F. Glover and V. Campos
461 Improved OR education through the use of spreadsheet models
H. Thiriez
477 A data envelopment analysis approach to measure the mutual fund performance
A. Basso and S. Funari
493 Single-machine scheduling with maintenance and repair rate-modifying activities
C.-Y. Lee and C.-S. Lin
514 Convex hull representations of models for computing collisions between multiple bodies
H.D. Sherali, J.C. Smith and S.Z. Selim
527 Co-op advertising models in manufacturer–retailer supply chains: A game theory approach
Z. Huang and S.X. Li

545 The effect of competition on the efficiency of secondary schools in England
S. Bradley, G. Johnes and J. Millington
569 Analysis of multiserver queues with constant retrial rate
J.R. Artalejo, A. Gómez-Corral and M.F. Neuts
582 The impact of product substitution on retail merchandising
K. Rajaram and C.S. Tang
602 Throughput, flow times, and service level in an unreliable assembly system
L. Liu and X.-M. Yuan
616 Carbon sequestration and land management under uncertainty
E. Krcmar, B. Stennes, G.C. van Kooten and I. Vertinsky
630 Contents Volume 135
633 Acknowledgement Referees
640 Invited Reviews 1997–2001
642 Feature Issues 1992–2001
644 Keyword Index Volumes 128–135 (2001)
652 Author Index Volumes 128–135 (2001)
671 Book Review Index Volumes 128–135 (2001)
